[DAB] Radio Stations in the United Kingdom & the Republic of Ireland

Latest update: 20 September 2026. <http://dabradiointheukdatabase.com/>

Key to Abbreviations:

Ensemble	Bundle of Radio Stations together, known as an Ensemble or Multiplexe.
Blocks	Frequency band between 174 and 230 MHz. (Blocks 5A – 13F).
Eld	Ensemble Identifier code. (C = UK)
Service	Audio Radio Service & Service Label. (C = UK) (sec) = Secondary Service , used as required.
Short	Short Service Label - Displays only 8 characters.
Sld	Audio Service Identifier code.
BitRate	Presented in kbit/s. (Variable bitrates on some BBC Networks)
Coding	DAB MP2 – MPEG Audio Layer II. Joint Stereo – Audio Mode in which two channels forming a stereo pair (Left & Right). Mono – Sound reproduction using only one channel. DAB+/AAC – (Advanced Audio Coding) DAB+/LC-AAC – (Low Complexity) AAC. DAB+/HE-AAC – (High Efficiency) AAC. High Efficiency AAC (HE-AAC) is a lossy data compression scheme for digital audio. It is an extension of Low Complexity AAC (LC-AAC) optimised for low-bitrate applications such as streaming audio. DAB+/HE-AAC v1 – Uses SBR (Spectral Band Replication) to enhance the compression efficiency in the frequency domain. DAB+/HE-AAC v2 – Couples SBR with PS (Parametric Stereo) to enhance the compression efficiency of stereo signals.
PTy	(Programme Type) Feature allowing programme contents to be categorised. (dynamic PTy on some BBC Networks).
Site	DAB transmitter site location.
Pwr	Power expressed in Kilowatts.
Protection	Protection Level. These error protection levels are known as UEP 3, UEP 2 & UEP 1 for DAB services and as EEP 3A, EEP 2A & EEP 1A for DAB+ services. (1. Being the highest protection).
Tii	(Transmitter Identification Information) 4 pin code. First 2 digits (Main) refers to a Region & Second digits (Sub) refers to the transmitter site within that region. Note: not all sites have this function and some do not conform to the Ofcom database. (This code is a non-requirement). 0102 The first set of values are taken from the Ofcom Technical Parameters DAB Database. (0102) The second set of values are codes that have been reported as not conforming to the Ofcom List. (----) = No tii codes are available from this site. (0000) This site has no tii code, but displays 0000 . All codes are shown in DEC.
Cid	Position of service on carrier.
dns	Service logos are supplied by RadioDNS, providing that an internet connection is present.
mot	Service logos / Slideshows... etc are embeded within the service, on the mulitplexe.

I would like to thank BDXC for kindly including this document on there website.

This database is for BDXC Members and uses the bulk of information from myself, while travelling around the UK. I would also like to thank, digitalbitrate.com, Wohnort DAB, DABLIST (+ floating cars), DigitalSpy Forums, Ofcom, RadioToday, RadioFeeds & IK along with individual BDXC Members for there input also, much appreciated. Thank You.
